

AFOLAYAN STEPHEN OLUWAYOMI

React Native Engineer · Expo · Firebase · Supabase

Egbe, Nigeria (open to remote and relocation) · afolayan4life@gmail.com · +234 816 599 4688

[linkedin.com/in/jilh](https://www.linkedin.com/in/jilh) · github.com/jilh · jilh.netlify.app · [Google Play: JILH](https://play.google.com/store/apps/details?id=com.jilh)

SUMMARY

Mobile engineer who ships. Three React Native apps live on Google Play, a fourth launching this year, and a track record of building the hard parts that make an app feel real: offline-first storage with online sync, push notifications, real-time group play, and payments. Coding since 2009, professional since 2016, with a degree in Computer Science. I also lead developer communities and run a tech training program, so I work well with designers, backend engineers, and users, and I explain technical decisions clearly.

TECHNICAL SKILLS

Mobile: React Native, Expo, Context API, AsyncStorage, push notifications, offline storage and sync

Backend & data: Supabase, Firebase, REST APIs, Paystack payments, Postman

Languages & web: JavaScript, React, Python, PHP, HTML/CSS

AI & tooling: OpenAI API, LangChain, Pinecone, Google Antigravity (AI-assisted development), Git/GitHub, Figma

MOBILE APPS

Akosori: Bible quiz with group play

Feb 2026 · Expo, Supabase

- Built real-time group play for teams, in the style of a live quiz game, with a reward system for players
- Implemented offline play with online sync, so quizzes work without a connection and results sync when the user is back online
- Live on Google Play with 50+ downloads

RC Hymns: offline hymn book

Jun 2024 · Expo, Firebase

- Built a full hymn library that works offline, with hymn sharing as images
- Grew to 5,000+ downloads on Google Play through the church community

Anony.ng: anonymous messaging

Dec 2024 · Expo, Firebase

- Designed an anonymous sign-up flow that needs only a username and password, with no email required
- Implemented push notifications for new messages
- Rated 5.0 on Google Play with 100+ downloads

Vendorl: mobile point-of-sale for small businesses

Launching soon · Expo, Supabase

- Building a POS app that lets small business owners accept sales without buying POS hardware.

EXPERIENCE

React Native Engineer (Contract), Insync App

Jan 2023 – Feb 2023

- Built 20+ mobile screens from designs using reusable React Native components
- Implemented Context API for app-wide state management and integrated security libraries to protect user data
- Worked closely with designers and backend developers so the UI matched functionality and business needs

Program Manager, Brave Redemptive

June 2024 – Present

- Run a software and design training hub; delivered a fellowship cohort of 24 (from 400+ applicants) with 23 now employed
- Built Google Sheets and AppScript automation for reporting, finance, assignment grading, and form-calendar workflows

Web Developer (Full-stack PHP), Education Online Nigeria

Aug 2016 – Feb 2017

- Built the company website and an internal staff posting tool with CodeIgniter, JavaScript, and Bootstrap

PROJECTS

- **DiagnoChat:** AI medical-assistant prototype for doctors, built with React Native, the OpenAI API, and AsyncStorage
- **GigsRepo:** community job-matching platform with real-time features, built with React and Firebase

COMMUNITY & SPEAKING

- Lead Organizer of Google Developer Group Egbe: 0 to 258 members and 23+ events, including Flutter Forward and Build with AI
- Hosted the first tech conference in Egbe (300+ attendees); raised international sponsorship from VMware and Mullvad
- TEDx speaker (Thomas Adewumi University, 2023) and DevFest speaker in Lokoja, Ogbomoso, Ilorin, and Ikot-Ekpene · [Watch the talk](#)

EDUCATION

MBA, Marketing & Strategy, Miva Open University, 2026 (CGPA 4.67/5, Distinction)

B.Sc. Computer Science, Ladoke Akintola University of Technology, 2024 (4.18/5, Second Class Upper)

National Diploma, Computer Science, Kwara State Polytechnic, 2016

Certifications: Associate AI Engineer for Developers (DataCamp) · Deploying AI into Production with FastAPI (DataCamp) · Developing AI Applications (DataCamp) · Postman Student Expert
